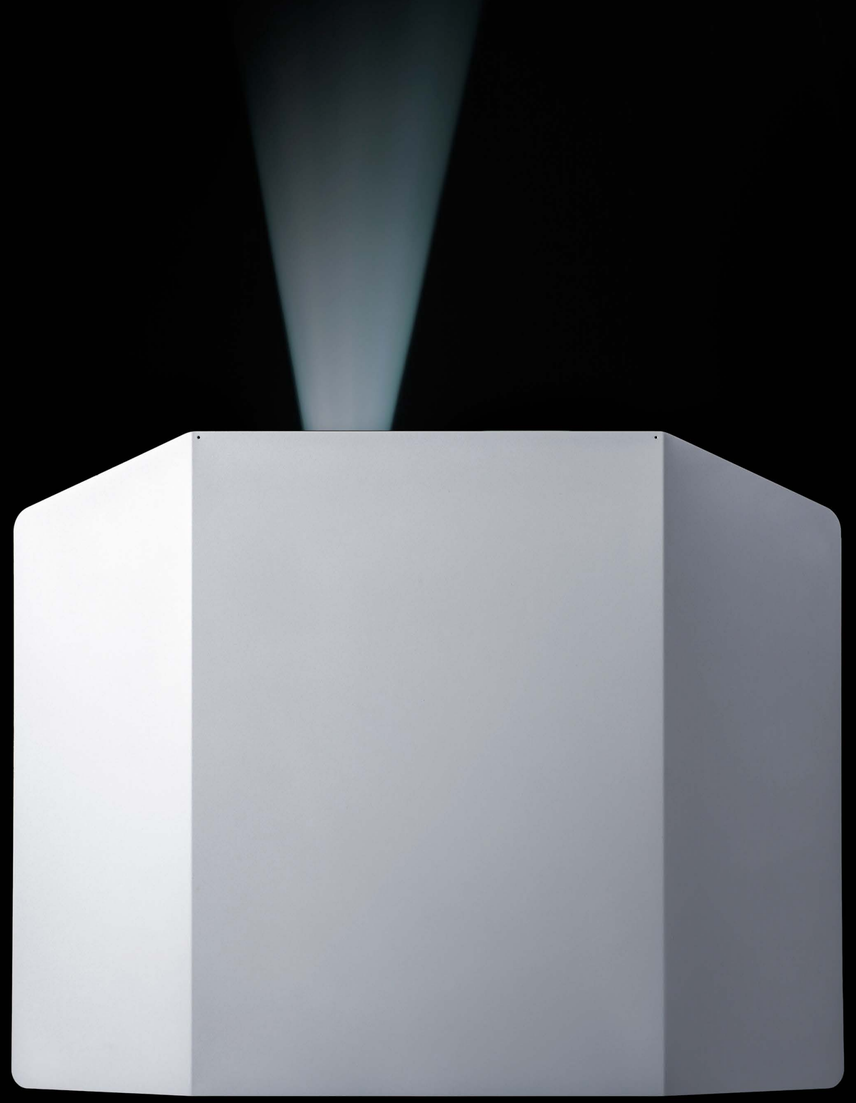
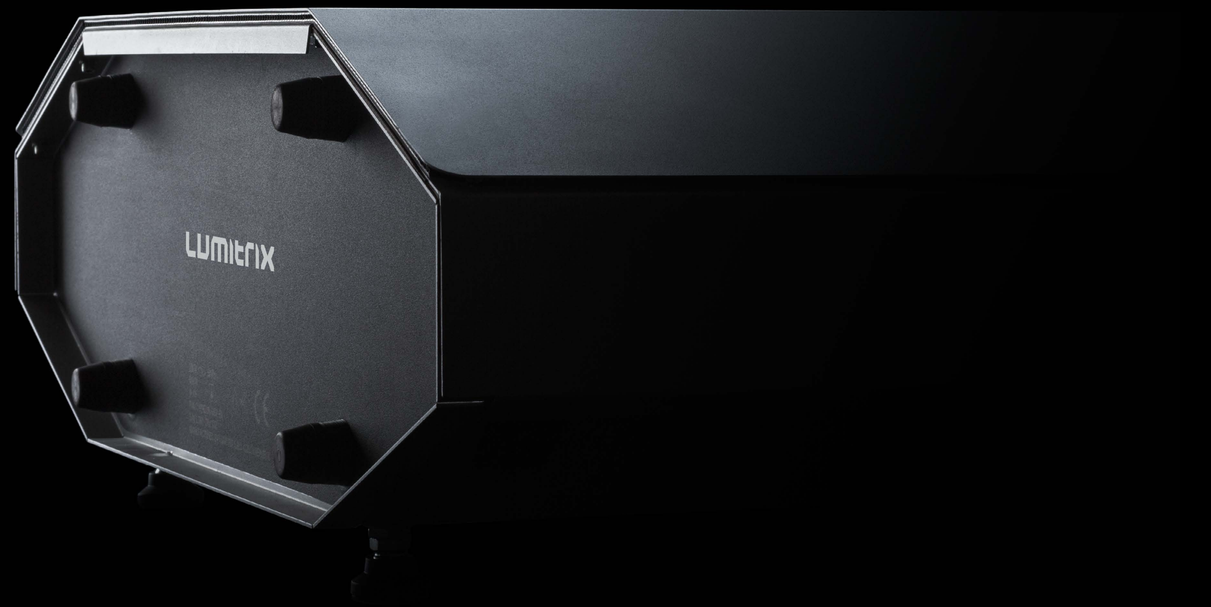
Revolutionary Mapping Projector

T2 SERIES



From time to time,
an innovative product doesn't fit in any
existing class because it is a category of its own.

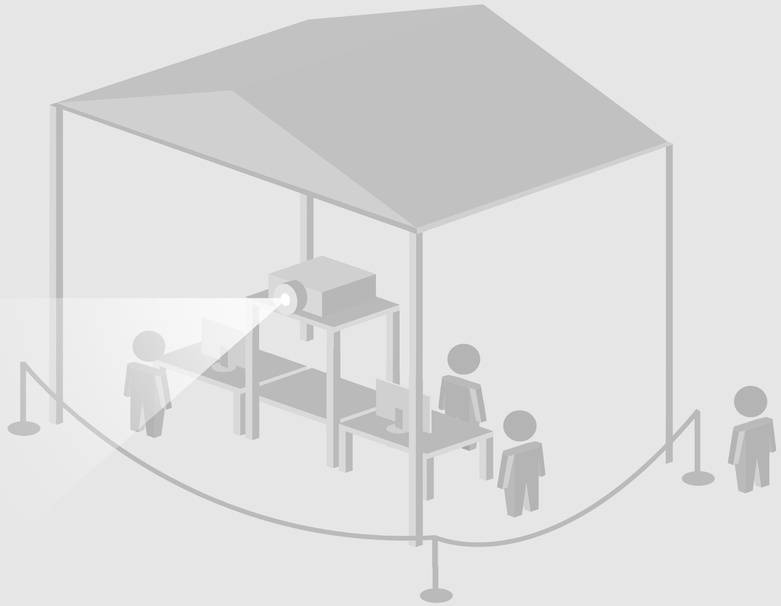
Explore 10 revolutionary facts about LUMITRIX
and start a journey into the future
of digital outdoor projections.



01

Smart Stand-alone Solution

Unlike the traditional projection set-ups
LUMITRIX integrates all required functional components*
in a single device. This makes its use significantly easier.



A traditional outdoor projection set-up with the designers operating projectors in a tent.

***DLP Projector; Media Server; Mapping Designer; GSM Remote Access; Camera; Power Manager**

02

State of the Art Attachment Fixtures

For the most convenient projector handling and installation versatility available in the proAV market.

Portable tripod
for short-term events

Wall/post fixture
for permanent set-ups

03

Weatherproof Body

with air filter and overvoltage protection
is ready for tough conditions.

Including after-blackout show-restart management for installations on places with non-reliable power sources.
IP43 certified

04

Lightweight Aluminium Chassis

in compact size.

Because every gram counts

when lifting equipment in heights.

Total weight of a LUMITRIX T2 unit: 21 kg
